

I hired Charlie Jones as my architect to design our house. The existing house was 1800sq ft., built in 1945 by the home owner, in need of major renovation, no basement and the kitchen was very outdated. I decided to do a total renovation on the house that involved totally gutting out the entire existing house and adding a two story addition onto the back of the house. I knew how I wanted the new house to look and Charlie capture my vision on paper. The new house boost three large bedroom in which one of the rooms goes out onto a balcony. Also, two full bathrooms, laundry room and a large kitchen with granite counter tops and maple wood cabinets. We have hardwood flooring throughout except in the kitchen, bathrooms and laundry room. The new sq. ft. is now 2,200. My family and I love our new home and highly recommend Charlie Jones for your Architectural renovation.

Sincerely,

Glenn and Cynthia Knight
